

Dr Jillian Spencer has been given termination and show cause notices for speaking out about the harms of gender medicine interventions.

CALL FOR SIGNATURES

DUTY OF CARE

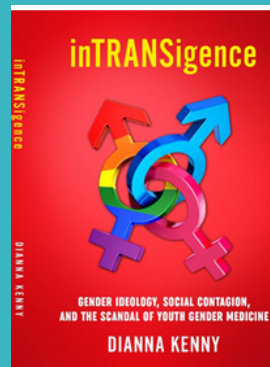

Systematic reviews show lack of evidence of benefit and serious harms.

The Cass Review

"Childhood gender dysphoria is strongly associated with gay, lesbian, or bisexual outcomes, and most children resolve dysphoria during maturation."

Active Watchful Waiting

"Puberty blockers and cross-sex hormones cause structural alterations in the brain. No one knows the long-term effects. Their use...is utterly experimental." Professor John Whitehall, Paediatrician

"There is no compelling evidence that affirmation decreases the risk of suicide." Dr. Andrew Amos, Psychiatrist

Justice Strum criticised the gender clinic that was treating "Devin" for what he saw as an "ideological commitment to a gender-affirming model."

"Gender transition treatment does not lower the risk of suicide." Prof. Dianna Kenny, Psychologist
